Introduction

I have a passion for optimizing and analyzing systems to get the most performance out of an application. I also enjoy opportunities to work with Big Data and applications at scale. I love duck typing and learning new languages and consider myself to be apart of the devops and polygot developer cultures. I also enjoy learning how to optimize tasks through concurrency and working on distributed systems as well as screen scraping and data mining.

Skills

Languages:

- Ruby (*2008-Present*) — Java (focus on Android) (*1.5 Years*) — HTML, CSS, JavaScript (*2005-Present*)
- C (*2 Years*) — Python (*1.5 Years*) — PHP (*2007-Present*)

Databases:

- MySQL (*2006-Present*) — MongoDB (*1.5 Years*)

Frameworks:

- Rails (*2008-Present*) — Rspec (*2010-Present*) — Sinatra (*2010-Present*)

Operating Systems:

- Mac OSX — Debian-based distros (*2010-Present*) — Redhat-based distros (*2005-Present*) — Windows
- FreeBSD(5-7) (*3 Years*)

Other:

- Vim — Data mining — Git — nginx — unicorn — LigHTTPd — mongrel — thin — Apache — SendMail — Postfix — Dovecot — SpamAssasin — Photoshop

(Learning):

- PostgreSQL — Erlang — Scala — C#

Work Experience
